

TAPERTUBE™...

The Ideal Piles for Land or Marine Projects

Tough, Trouble-Free, Patented Tapertube Piles Save Time, Reduce Costs, Outperform Others

Project-proven Tapertube™ is a dramatic leap forward in on-the-job pile performance. Superior design and robust construction mean these remarkable tools deliver big advantages over conventional piles or other tapered piles. Tapertube piles are available in an array of shapes and sizes to meet your soil and capacity requirements.

TAPERTUBE ADVANTAGES

- High capacities for shorter driven lengths
- Conventional equipment and installation methods
- Reduces concrete volume requirements
- Factory attached cast steel points
- Standard pipe extensions that match Tapertube diameters
- Directly driven... no mandrel or butt reinforcement required
- Full-butt welded splices for direct bearing of pipe extension on Tapertube
- Drive-fit DFP S-1800 sleeves may be used instead of welding to extend piles
- Heavier thickness provides greater drivability, eliminates need for coating and reinforcement

TAPERTUBE INSTALLATIONS

JFK Airport NYC

- British Airways Terminal • International Arrivals Bldg. • Terminal Four Roadways
- Light Rail System • Cargo Bldg. Eight • Cargo Bldg. Nine • American Airlines Landside
- Bus Gate International Arrivals • Jamaica Station • Jet Blue Garage
